

# Scientific production on football in spanish journals of physical activity and sport sciences [Produção científica sobre futebol em revistas espanholas de ciências da atividade física e esportes] [Producción científica sobre fútbol en revistas españolas de ciencias de la actividad física y del deporte]

Martín-Nebreda X.

Pérez-Gutiérrez M.

Gómez-Alonso M.T.

Gutiérrez-García C.

study analyzes, from a bibliometric perspective, papers published in 40 Spanish journals under the category ?deportes? (sports) of the Latindex Catalogue, between 2001 and 2012. Aspects analyzed include: (1) number of papers published about football; percentage regarding total papers published; and distribution among journals; (2) evolution over time; and (3) disciplines. Results showed that the scientific production on football was prominent (7.9% of total published papers), on the rise, multidisciplinary, and unequal among journals and disciplines. The most outstanding disciplines were those related to Psychology, Law, Organization, and Management. © 2015, Universidade Federal do Rio Grande do Sul. All rights reserved.
