

What, how many and where is it Written in Linguistics? Analysis of the Scientific Production of Doctorate Scholarchips Conicyt-Chile [¿Qué, cuánto y dónde se escribe en lingüística?: Análisis de la producción científica de los becarios de doctorado CONICYT-Chile]

Valenzuela Á.

Pino-Alonso D.

Scientific production through the publication of articles has become a criterion of validation and research qualification in the formation of advanced human capital. Therefore, the objective of this study was to analyze the scientific production in linguistics, particularly that generated by doctoral graduates financed by the scholarship program of Chile. Regarding the methodology, the publications carried out by the fellows whose discharge was between 2008 and 2015 were considered as the unit of analysis. The results indicate that the dynamics of scientific production are relatively stable, with rises occurring at the end of the training process doctoral. © 2018 Universidad Católica Silva Henríquez.
